

# SOCIAL MEDIA AUDIT £80

A Social Media Audit is perfect if you're looking to grow your online presence but feel stuck, unsure what's working, or know your social media could be improved.

It's an in-depth evaluation of your business across all platforms, reviewing how your brand appears online — including social media profiles and your overall presence on search engines such as Google.

Whether you're a start-up business just getting started, or an established brand ready to take things to the next level, a Social Media Audit can help you gain clarity, direction, and a strategy for growth.

## How it works:

To apply for a Social Media Audit, simply fill out the enquiry form and I will be in touch within 3 working days.

Once I understand your business goals and current pain points, I will request access to your:

- Instagram account
- Meta Business Suite (including Facebook access)
- Any other platforms you currently use

From there, I will complete an in-depth review and create a realistic, actionable plan tailored to your business.

Finally, we'll go through everything together during a Google Meet call, where I will explain the findings and talk you through the next steps to help you grow your online presence.
